Sodium Ferro cyanide (SFC): Na₄Fe (CN)₆ : 10H₂O

Sodium Ferro cyanide is manufactured by our own R&D based Eco-friendly technology.

EXCLUSIVE FEATURES

- Yellow Crystalline, free flowing dry product.
- Prepared by the reaction of Sodium Cyanide with Ferrous salt.
- Our R&D Center received National Award for developing the Technology in 1993.

APPLICATIONS

- Manufacture of Sodium Ferrocyanide
- Blue Pigments
- Blue Print paper
- Photography
- Manufacture of Aniline Black
- Metal and Leather Tanning Industry
- Dyeing Industry
- Anticaking agent
- Biochemical Processes

ADVANTAGES

- guaranteed minimum 99% purity of this stable compound at normal temperature.
- QCD is equipped with most modern instruments to analyze special tests also on request.

SPECIFICATIONS

No	Characteristic	Specifications		
1	Assay (as Na ₄ Fe(CN) ₆ ,10H ₂ O)	%	99.00	min.
2	Sulphate (as SO ₄)	%	0.10	max.
Caution: Keep in tightly closed container being Hygroscopic.				

PACKING

- 50 Kg woven HDPE Bags with Polythene liner.
- PRODUCTION CAPACITY
- 100 Tonnes/ Annum
